SUMMARY

Back-End Developer with 1.5 years of experience building RESTful Web APIs in C# and ASP.NET Core using Clean Architecture, SOLID principles, Entity Framework Core, and SQL Server. Reduced API response time by approximately 20% through EF Core query optimization and SQL indexing. Implemented JWT authentication and role-based access control (RBAC), and delivered core business workflows across 6+ ERP modules. Experienced with SignalR, Docker, Git, and CI/CD using GitHub Actions.

SKILLS

Languages: C#, SQL, TypeScript, JavaScript (ES6+), PHP
Back-End: ASP.NET Core Web API, ASP.NET Core MVC, RESTful APIs, Entity Framework Core, LINQ, Dapper, SignalR, Middleware, Microservices, Dependency Injection, JWT Authentication, Role-Based Access Control (RBAC), AutoMapper
Databases: SQL Server, MySQL, Indexing and Query Optimization
Architecture: Clean Architecture, SOLID Principles, Design Patterns, Repository Pattern, Unit of Work
Testing and DevOps: xUnit, Docker, Git, GitHub, GitHub Actions, CI/CD, Postman, Swagger
Front-End: Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap
Other: Laravel, Eloquent ORM, Agile, Scrum (2-week sprints)

EXPERIENCE

Back-End / Full-Stack Developer | XeoTech | Part-time | Mar 2026 - Aug 2026

- Contributed to XeoTech ERP, a large modular platform covering Accounting, HR and Payroll, Sales and CRM, Purchasing, Inventory, Manufacturing, Projects, Treasury, Tax, Workflow, and Reports/BI.
- Implemented core business workflows in .NET (invoicing, purchase orders, goods receipts, stock movements, payroll, manufacturing orders, payments, approval flows) across 6+ ERP modules, maintaining data consistency and reducing manual processing errors.
- Built maintainable APIs with .NET and frontend interactions with Vanilla JavaScript, focusing on business rules and data consistency.

Back-End Developer | SoulTech | Full-time | Oct 2025 - Feb 2026

- Developed ASP.NET Core APIs powering E-commerce and mobile applications, supporting payments, order processing, and push notifications for a growing user base.
- Reduced API response time by approximately 20% through Entity Framework Core query optimization and SQL Server indexing improvements.
- Implemented JWT authentication and role-based access control (RBAC), collaborating with mobile and front-end teams in an Agile environment with 2-week sprints.

PROJECTS

Real Estate Platform (.NET, ASP.NET Core, EF Core) | Freelance

- Designed a modular platform using ASP.NET Core, Clean Architecture, and SOLID principles.
- Implemented role-specific back-end portals (Admin, Vendor/Agent, End-User) with JWT authorization and distinct business workflows.
- Built dynamic multi-criteria search APIs (location, price, property features) using optimized LINQ queries and AutoMapper DTOs.
- Implemented listing workflows: Admin status approvals, Vendor listing controls, and media storage integration.
- Applied Repository and Unit of Work patterns with EF Core to ensure safe database transactions and prevent performance bottlenecks.

E-Commerce Platform (Angular, ASP.NET Core, SQL Server)

- Built 31+ ASP.NET Core REST APIs for a multi-vendor e-commerce platform, reducing latency by 15% through SQL indexing and optimized EF Core query patterns.
- Designed JWT-based RBAC for Admin, Vendor, Customer, and Customer Service roles.
- Integrated SignalR for real-time notifications, improving user response time by 25%.
- Delivered the platform with an Angular front end in a cross-functional Agile team.

Employees Management System (Laravel, MySQL)

- Built RESTful APIs for employee profiles, attendance, leave management, and payroll, with Laravel Sanctum / JWT authentication and RBAC middleware.

EDUCATION

Bachelor of Commerce (B.Com), English Section | Helwan University, Cairo | Aug 2019 - Jul 2023

CERTIFICATIONS

- Back-End Developer (.NET) Training, EraaSoft, 2024
- Laravel Developer Certificate, Pioneers, 2024
- Postman API Fundamentals Student Expert, Postman, 2024
- Microsoft Learn Pathways: SQL Server and Azure SQL Modules
