-

PERSONAL PROJECTS

E-Commerce Web Application with Admin Dashboard

- Built using .NET (Blazor MVC) with a Repository Design Pattern for the backend.
- Designed and implemented a role-based access system (Admin, Super Admin, User) to manage permissions.
- Developed a responsive Admin Dashboard for product, order, and user management.
- Added localization support to provide a multi-language user experience.
- Ensured scalability and maintainability by applying clean coding practices.

E-Commerce Web Application (Laravel Version)

- Rebuilt the same project using PHP Laravel framework to strengthen backend development skills.
 - Implemented role-based authentication (Admin, Super Admin, User) and localization features.
 - Developed a structured Admin Dashboard for managing products, orders, and users.
 - Focused on clean code, scalability, and maintainable architecture.
-
