## SUMMARY

---

ASP.NET Core Developer with over a year of hands-on experience building high-performance, scalable RESTful Web APIs, with additional full-stack experience in Angular. Skilled in Clean Architecture, SOLID principles, and design patterns to ensure maintainable, testable code. Proven track record of optimizing data retrieval and implementing secure JWT-based authentication with RBAC (Role-Based Access Control) authorization. Experienced in Docker containerization and CI/CD workflows.

## TECHNICAL SKILLS

---

- **Backend Development:** ASP.NET Core (Web API), MVC, PHP (Laravel), SignalR, Middleware, RESTful APIs, Microservices Fundamentals.
- **Frontend Development:** Angular 18, TypeScript, JavaScript (ES6+), HTML5/CSS3, Bootstrap.
- **Databases & ORM:** SQL Server, MySQL, Entity Framework Core (EF Core), LINQ, Dapper, Eloquent, Database Indexing & Query Optimization.
- **Architecture & Principles:** Clean Architecture, Onion Architecture, SOLID, Dependency Injection, Design Patterns, Repository & Unit of Work.
- **Testing & DevOps:** Unit Testing (xUnit, PHPUnit), Docker, Git/GitHub, CI/CD (GitHub Actions), Postman, Swagger.

## EXPERIENCE

---

### Full-Stack Developer (Part-time)

*SoulTech | Apr 2026 – Present*

- Engineered a multi-tenant system with strict data isolation for secure vendor dashboards.
- Developed dynamic Angular 18 UIs with NgRx for centralized, predictable state management across the application.
- Built a logistics engine with real-time shipment tracking and automated webhook-driven payment updates.
- Optimized EF Core queries and implemented caching strategies to improve response times and stability under high traffic.
- Managed CI/CD pipelines using Docker and GitHub Actions in an Agile environment.

### Real Estate Platform (.NET Core)

*Freelance | Mar 2026*

- Developed a scalable backend using Clean Architecture and ASP.NET Core to ensure a decoupled, testable codebase.
- Implemented Repository & Unit of Work patterns to abstract data access logic, enabling isolated unit testing of business logic.
- Built an Admin Dashboard with complex, multi-criteria filtering, using DTOs and AutoMapper to streamline data mapping and reduce response payload size.

## Backend Developer Intern

EraaSoft | Apr 2025 – Dec 2025

- Built 20+ ASP.NET Core APIs, reducing latency by 15% through SQL indexing strategies and optimized EF Core query patterns.
- Designed RBAC security using JWT to manage Admin, Vendor, and Customer roles.
- Integrated SignalR for real-time notifications, improving user response time by 25%.
- Collaborated within a cross-functional Agile team to architect and deliver a scalable multi-vendor e-commerce platform.

## PROJECTS

---

### Employees Management System (Laravel) | Nov 2025

- Developed an HR management system using Laravel and MySQL, focusing on high-performance database design and optimized Eloquent queries for complex data retrieval.
- Architected secure RESTful APIs using Laravel Sanctum/Passport, implementing granular Role-Based Access Control (RBAC) via custom middleware.
- Engineered scalable core HR modules for attendance and leave management, adopting Clean Architecture patterns, service classes, and API Resources for maintainable, testable code.

## EDUCATION

---

### Bachelor of Commerce (B.Com), English Section

Helwan University, Cairo | Aug 2019 – Jul 2023

## CERTIFICATIONS

---

- Postman API Fundamentals Student Expert - Postman | 2025
- Back-End Developer (.NET) Training Certificate - EraaSoft | 2025
- Laravel Developer Certificate - Pioneers | 2024
- Microsoft Learn Pathways: SQL Server & Azure SQL Modules

## LANGUAGES

---

Arabic – Native | English – Fluent (Professional Proficiency)
